

PHILADELPHIA ORCHARD PROJECT

Recommended Plant Sources (Updated February 2023)

We are sharing below a list of our favorite edible plant nurseries. Potted plants are more expensive and may be bigger in size; bareroots are less expensive and more cultivars are available, but they can only be purchased in the winter (with delivery in the early spring). While not open for drop-in purchases, POP does sell some plants via our edible plant nursery at The Woodlands through spring and fall plant sales. Visit phillyorchards.org/events for more information.
